

KRANMEISTER

Aluminium loading forks

Proven in practice - ideal for the building trade

1200 to 1700 kg payload

- With automatic weight compensation
- No minimum load required
- Low empty weight and up to 64% lighter than steel forks
- Therefore higher payloads and better reach in crane use

Height adjustable on request

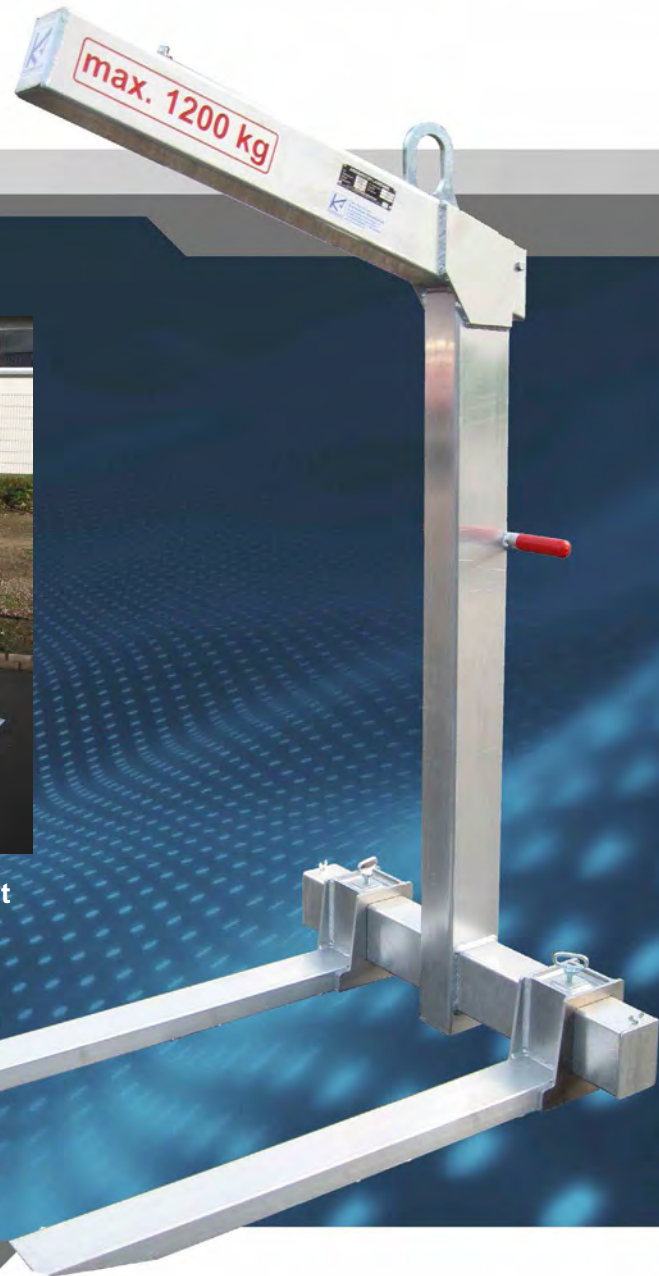

- Advantage for cranes with low hook height

Space-saving

- for transport on crane or truck

Elegant profiles

- made of high-strength aluminium alloy

www.trailercranes.co.uk

Aluminium loading forks - light, rustproof and durable

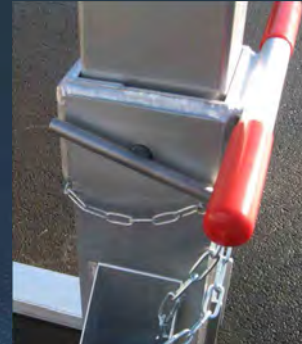

Automatic weight compensation and maintenance-free compression spring system

Easy hooking of the crane hook

Adjustable forks, specially welded profiles for high load capacity

Optionally height-adjustable - good telescoping properties due to optimum tolerances

Practical - good functionality and handling
